

Non-Routine Vendor Mouse Importation Q&A

1. What are non-routine vendors?

All rodents acquired from non-routine sources (e.g. other universities and institutions) are not permitted to enter standard housing at the University of Rochester until the health status of each group has been assessed by the veterinary staff. Animals originating from an academic institution or any source other than an approved commercial vendor (Jackson Labs, Charles River, Taconic, Envigo) are classified as non-routine vendors.
