UPCOMING VIRTUAL SEMINAR

Integrating Organizational Actions toward Patient Safety and Clinician Wellbeing: Budgeting Clinician Cognitive Resources Strategically in Healthcare Delivery

Thursday, September 23, 2021

12:00 PM to 1:00 PM

To register for this seminar, visit <https://forms.gle/yrNoN4swioFBTaV37>

Presented by:

Michael R. Privitera, MS, MD

Professor of Psychiatry

Director, Outpatient Psychiatric Consultation Service

Medical Director, URM Medical Faculty and Clinician Wellness Program

Our current healthcare environment is dynamic and highly stressful. Understanding the lag of human cognitive adaptation behind technological advances can be key in mitigating risk associated with advanced technology. Wancisk Associates

Understanding basic human factors can help leaders and clinical teams connect and advance patient safety together. In this seminar, you will hear about a framework to build on traditional safety models, integrated with consideration for human factors affecting outcomes in patient safety as well as improving and sustaining the wellbeing of those taking care of the patients.

At the conclusion of the seminar, the participant will be able to:

1. Define and give examples of extraneous (unnecessary) cognitive load
2. Explain rationale of why reducing extraneous cognitive load burden may be more impactful in improving patient safety than clinician education alone.
3. Give two examples of application of cognitive ergonomics that can reduce the risk of clinician burnout and latent medical error.

Open to all faculty staff, and students

The Medical Faculty and Clinician Wellness Series is a qualifying activity for the URM Malpractice Premium Differential Program.
