Tuesday, October 26, 2021 14:00 p.m. to 5:00 p.m.

To register for this seminar <https://forms.gle/ofk35p3Up26KEwhXA>

When we supervise fellows, residents, and medical students, we assess their clinical reasoning, both on the fly and in evaluations at the end of rotations. We talk about clinical reasoning, but are we really assessing it? This workshop will explore the factors that may impact how you assess your learners, and a framework for approaching assessment.

By the end of this workshop, participants should be able to:

1. Identify how context impacts clinical reasoning
2. Identify how reproduction of diagnosis impacts assessment of clinical reasoning
