

Long Metal Roof Tile, "PLEGEL"*

Keiji Ozawa** Sumio Nagakari*** Minoru Osada****

1 Introduction

polyvinyl chloride resin galvanized steel sheets) and corresponding air temperatures was developed. At present,

roofing have long been used in residential roofing. The use of ribbed seam roofing, however, is now in sharp decline because of the material's many disadvantages: It

by Japanese users.

2.2 Specifications

Table 2 Results of thermal analysis 4-4

Temperature (°C)	Weight Residue (%)	DTG (dW/dT)	DSC (dH/dT)
20	100	0	0
100	100	0	0
200	100	0	0
300	100	0	0
400	100	0	0
500	100	0	0
600	100	0	0
700	100	0	0
800	100	0	0
900	100	0	0
1000	100	0	0

4 Concluding Remarks

PLEGEL has won increasing acceptance since going

into the market and it is now a well established business
